Cannabis In The Context of Broader Medication Stewardship – The Role of The Pharmacist In Making Clinical Interventions and Managing Drug Interactions

Pharmacists, as the medication experts on a patient’s health care team, provide valuable expertise to patients and other health care providers in the care of patients using cannabis for medical purposes. This presentation, through an overview and case illustration, will discuss the role of pharmacists as medication management stewards as it applies to their role in providing care to patients using cannabis for either medical or non-medical use, guiding patients and providers in a shared decision model of patient care and safety.

Shelita Dattani, BSc.Pharm., Pharm.D.
Director, Practice Development and Knowledge Translation
Canadian Pharmacists Association

6:30 – 7:30 p.m.

The Evidence for a Full Scope of Pharmacy Practice

Dr. Ross Tsuyuki will outline the evidence for a full scope of pharmacy practice, including patient outcomes, economic analyses, and patient satisfaction. He will also discuss implementation and policy change strategies.

Ross T. Tsuyuki, BSc(Pharm), PharmD, MSc, FCSHP, FACC, FCAHS

7:45 - 8:45 p.m.

Saturday, September 21, 2019

Panel Discussion: Creating a Value Proposition – How to Approach a Business Model and Have Discussions with Patients About Clinical Pharmacy Services

What is ‘value proposition’? Are you focusing your business model on health services that matter to your patients and the health system? How do you know? How can you market pharmacy services and communicate cost in a professional way? Can you have a successful clinical service business at a time when third party payers are not reimbursing for these additional services? Where do you start?

This dynamic panel will include: a pharmacy researcher, a community pharmacy owner and pharmacist, a pharmacist with a clinical consultation business, a new practitioner, and a marketing professional. Panel participants will discuss their views on the value proposition for clinical pharmacy services, as well as the barriers and opportunities for integrating clinical pharmacy services into practice today.

Various panelists

8:00 – 9:00 a.m.

<p>Managing Migraine Misery</p> <p>This session will review headache/migraine pathophysiology, red flags for complications, medication overuse headache, common triggers and non-pharmacological adjuncts for relief, prescription prophylaxis and acute treatment modalities, as well as provide an introduction to new/emerging therapies.</p>	<p>Nicole Gifford, <i>BSc. Pharm, CDE</i></p>	<p>9:15 – 10:15 a.m.</p>
<p>Obesity Management: What We Can Expect From the New Obesity Canada Clinical Practice Guidelines</p> <p>This session will review the complex and wide range of interactive contributors to obesity, including biological, behavioural and societal factors. It will also include a discussion around the current burden of illness of obesity in Canada; review the available evidence-based treatment options for obesity in Canada, with special focus on pharmacotherapy; as well as review the barriers and facilitators in access to obesity care in Canada.</p>	<p>Jennifer Donnan, <i>BScPharm, MSc, MBA, PhD</i></p>	<p>10:30 – 11:30 a.m.</p>
<p>RRR: Recent Research Ruminations</p> <p>RRR will highlight some of the research at Memorial University School of Pharmacy and will discuss the role of policy and pharmacy practice in the use of exempted codeine products; examine the role and limitations of observational research using Alzheimer's Disease as a case example; understand the utility of the Bradford Hill criteria when assessing observational research; and, examine the management of clinical relevant drug interactions in community pharmacy using an oral chemotherapy example.</p>	<p>Dr. Shawn Bugden, <i>Dean, MUN School of Pharmacy</i></p>	<p>1:00 – 2:00 p.m.</p>
<p>Compounding - New Standards: Risk Assessments, Create Master Formulations, and Other Compliance Questions Answered</p> <p>The new Model Standards have been released and every pharmacy is expected to comply with these standards regardless of size of practice. The most common questions when reading through the standards are; what is a Risk Assessment, and how do I do one?? What is the difference between a Master Formula, and what must be documented?? We will explore these questions, give guidance and context, as well as answer other common questions, kill some rumors and breath life back into your practice.</p>	<p>Sebastian Denison, <i>BSc Pharm, RPh</i></p>	<p>2:15 – 4:15 p.m.</p>
<p>Sunday, September 22, 2019</p>		
<p>Panel Discussion: Pharmacy Redesign – Staffing, Workflow and Technology</p> <p>Times are changing! Pharmacists can do more than ever before, pharmacy students are being trained differently, pharmacy technicians are regulated and ready to take on new roles, and new technologies become available every day. How can pharmacy workflow change to support evolving practice? During this panel discussion we will hear from community and hospital pharmacists who have designed new pharmacy workflows, optimized the roles of pharmacy staff through integration of pharmacy technicians, and embraced new technology to improve safety and efficiency. We will also discuss changes to how pharmacists are trained and the role and value of pharmacy students. Think about the changes you have made in your practice environment (or hope to make) because we want to hear from you too!</p>	<p>Various panelists</p>	<p>9:00 – 10:00 a.m.</p>

<p>Pharmacy Network 101: Beyond Basics and PMP-NL: First Year Results and FAQs</p> <p>This two-part session will begin with the Newfoundland and Labrador Centre for Health Information's (NLCHI) update on the Prescription Monitoring Program (PMP-NL) highlighting positive results seen after its inaugural year.</p> <p>It will also review pharmacist's responsibilities for dispensing a monitored drug as outlined in the <i>Prescription Monitoring Act</i>.</p> <p>The second half of the presentation will feature an update on the NL Pharmacy Network with a focus on in-depth user information including tips and tricks for interacting with, and interpreting, the clinical information contributed by other users.</p>	<p>Jeremy Harnum, NLCHI Madonna Whalen, NLCHI</p>	<p>10:15 – 11:15 a.m.</p>
<p>E-Cigarettes: Friend or Foe?</p> <p>This one-hour session will provide an overview of electronic cigarettes – what they are, how they work, what concerns there are about their use and their role in harm reduction or as a smoking cessation aid.</p>	<p>Dr. Leslie Phillips, BSc(Pharm), Pharm. D.</p> <p>Professor- Memorial University School of Pharmacy and Faculty of Medicine: Discipline of Psychiatry Pharmacist -Eastern Health Authority Psychosis Intervention and Early Recovery (PIER) Program</p>	<p>11:30 – 12:30 p.m.</p>

Dated August 22, 2019 – subject to change
