

2020 Universal Influenza Vaccination Program

PANL is reminding members that the Government of Newfoundland and Labrador has committed to a universal influenza vaccination program starting 2020-21 where pharmacists will be reimbursed for administering flu shots in pharmacies.

We have been advised that the Department of Health and Community Services anticipates an increased demand for flu vaccine this year and while they have significantly increased their order, there may still be shortages.

PANL will provide further detail as information becomes available.

Please feel free to direct any questions to jcollingwood@panl.net .
