

SESSION: Changing Trajectory: Making an Early Impact on Type 2 Diabetes

This session is 'live' only and will not be recorded and made available at a later date.

Date and Time:

Thursday, September 10, 2020

8:00 p.m. to 9:00 p.m.

Presentation Details:

This presentation will help participants recognize the benefits of achieving early control, compare anti-hyperglycemics with a focus on the oral option, discuss practical considerations for integrating new treatments earlier, and self-reflect on their current practice and identify opportunities to optimize patient care.

Presented by: Rob Roscoe, BSc. (Pharm), ACPR, CDE, CPT

About the presenter:

A graduate from Dalhousie University, (1984) Mr. Roscoe completed his Hospital Pharmacy Residency at Saint John Regional Hospital(1985) and worked in various hospitals in the New Brunswick region before finding his place in community pharmacy (one location for 27 years).

He now provides collaborative diabetes clinics (last seven years) within family practitioners offices seeing individual patients as part of his innovative practice.

Mr. Roscoe has a long list of accomplishments in the field.

- One of the co-authors/expert committee members of the 2013 CDA Clinical Practice Guidelines and the DC (Diabetes Canada) 2018 Guidelines.
- He is on the Board of Directors of the Canadian Diabetes Educator Certification Board,

- He is one of the founding board members and an author of the Forum for Injection Technique in Canada (FIT)
- He has represented the pharmacist's role in a patient's diabetes care team for a Discovery Channel special
- Recently Published in International Journal of Diabetes as one of the writing team for article "Insulin Matters: A Practical Approach to Basal Insulin Management in Type 2 Diabetes. 2018
- He also is the lead author in a number of accredited CME (Continuing Medical Education) programs.
