

### **Important Update Re: SaferMedsNL Phase 3**

Please be advised that Phase 3 of the SaferMedsNL public awareness campaign will continue to focus on appropriate use of reflux medications and sedative hypnotics for insomnia rather than introduce the new topic of opioids as was the original intent.

Pharmacists may continue to bill for PPI and sleeping pill initial and follow up consultations until **January 2022**. SaferMedsNL resources are available on the PANL website at: <https://panl.net/resources/safermedsnl/> .
